## WHAT IS HAPPENING FOR PHDS?

- a new record: 212,400 individuals enrolled in doctoral programs in Germany over 2024, underscoring the necessity for strong doctoral representation and improved support systems.
- the Nobel prizes were handed out in the beginning of Oktober. This year for quantum computer, metalorganic sponges and peripheral immune tolerance.
- Chinese medical team transplanted genetically modified pig liver into a human, who survived nearly 6 months.

Let us develop respect for all living things. Let us try to replace violence and intolerance with understanding and compassion. And love.
